

Guide: How to take a photo of your ID-document with your mobile phone

Step 1: Find a sunny or well-lit room to take your photo

Step 2: Place your ID-document on a flat surface (such as a table)

Step 3: Use the Camera on your phone and send the image as an image-file (jpg) directly from your camera roll. DO NOT USE A PDF-scanner on your phone, it reduces the quality of the image.

Step 4: Take the photo of the ID-document without flash!

Follow the instructions for passport below and ID -card on page 2.

Passport

1. Make sure the passport lays completely flat like in the example below

2. Take a picture with all corners included, no flash, datapage and the first visa page
