Agenda – Kick-off Nordic-Baltic coordination network on regulatory issues (NOBAREG)

9. November 2022, 09:30 – 15:30

Venue: Thon Hotel Slottsparken

Participants:

Denmark	Finland	Sweden
Estonia (Digital)	Latvia	Aaland Island
Faroe Islands	Lithuania	Norway

Topics	Annotation
Presentation of the DGA, DA and the AIA. Information sharing on status of "Competent bodies" at national level for the implementation of forthcoming EU regulations. Introduction and discussion of Digitalisation- and automatisation ready legislation. Way forward: Next meetings, expectations on participation from the delegates.	After short presentations intended to give an overview of the **three regulations**, the delegates gave their points of view through a tour de table, based on the background questions distributed before the meeting. It was agreed that - The task regarding the implementation of the Single Digital Gateway was to be deprioritized for the time being, based on amongst others the ongoing "Single Digital Gateway Once Only Principle Proof of Concept Pilots Project" under the Cross-Border Digital Service- Program.[1] - As the Artificial Intelligence Act and Data Act is still not adopted, the focus should be on the Data Governance Act for the time being. The different input and contributions given through this session will form a basis and direction for the networks further work. The same applies for the afternoon session on **digitalisation- and automatization ready legislation**. The conversations held after the presentation was aimed at identifying any shared understanding, as well as exchanging knowledge on different national models, which may feed into national deliberations. The last session concentrated on framework and formalities for the network to work under. It was agreed that: 1. The network **reports** to the HNG of the Nordic Council of Ministers, MR-Digital. 2. The PL shared the **Project Description** to the NCMs. 3. **Meetings** will be planned as presented during the meeting, e.g., three physical meeting to be arranged throughout 2023, preferably adjacent to relevant arrangements in Europe. 4. No **documents** or other in formation will go out from the group without prior, unanimous consent from all participants in the network.

Methods of working, other related subject matters etc.	5. **Minutes** from meetings will be short, while notes taken by the PL (or his associates) will be used as background for a final report. 6. We all recognise that this is **not a political network**, and that positions stated through the meeting, is not necessarily national positions. That said, and in referral to point 4, all statements in the final report should be nationally anchored. 7. Members can draw on internal resources in this network if they see fit for purpose, e.g., when discussing more in details, special competences are welcome to join meetings. 8. All participants will be invited to a common **Teams-channel** for access to and the sharing of relevant information. Dues to the possible sensitivity in WIP-documents, access to the Teams-channel should be restricted to members of the network and other individuals close to the project, such as deputy members and HNG secretariat.
